MESSAGE

It is a privilege to know that the **Council for Technical Development and Continuing Academic Educational and Scientific Studies (CTDS)** is celebrating its tenth anniversary. Students and job seekers should be empowered with exceptional skills for employment of their choice. Our education system attains meaning when the youth are effectively oriented for well placed jobs. The **Council for Technical Development and Continuing Academic Educational and Scientific Studies** is a path breaker in this regard. A leading force in skill development and workforce empowerment, **CTDS** is instrumental in promoting social and economic transformation in our society.

I wish this endeavour all success.

A. N. SHAMSEER
